Author Affiliation: General Electr. Corp. Res. & Div., Schenectady, NY, USA

Conference Title: Sixth International Conference on Data Engineering  
(Cat. No.90CH2840-7) p.237-44

Publisher: IEEE Comput. Soc, Los Alamitos, CA, USA

Publication Date: 1990 Country of Publication: USA xii+585 pp.

ISBN: 0 8186 2025 0

U.S. Copyright Clearance Center Code: CH2840-7/90/0000-0237\$01.00

Conference Sponsor: IEEE

Conference Date: 5-9 Feb. 1990 Conference Location: Los Angeles, CA, USA

Language: English Document Type: Conference Paper (PA)

Treatment: Practical (P)

Abstract: A novel system which combines elements of database management, object-oriented technology and artificial intelligence is described. This system addresses certain bill-of-material (BOM) configuration generation problems and should not be confused with the more typical BOM recursive traversal problems. The BOM configuration system automatically extracts design rules from existing BOM designs. The system then, in turn, applies the rules to generate new BOM designs. It is shown that there are special requirements of the applications that make BOM configuration a difficult process. (11 Refs)

Subfile: C

Descriptors: artificial intelligence; configuration management; database management systems; object-oriented programming; software engineering

Identifiers: database management; object-oriented technology; artificial intelligence; bill-of-material; configuration generation problems; BOM configuration system; design rules; existing BOM designs; special requirements

Class Codes: C0310F (Software development management); C6160 (Database

management systems (DBMS)); C6110B (Software engineering techniques); C6170  
(Expert systems)

Author(s): Blaha, M.R.; Premerlani, W.J.; Bender, A.R.; Salemme, R.M.;
